

VDI Platform Comparison

Not all virtual desktop and application delivery platforms are created equal. This document provides a side-by-side feature comparison of Inuvika OVD Enterprise against the most widely evaluated competitors—so you can make an informed decision based on capabilities, cost, and fit for your organization.

5 Reasons Organizations Choose Inuvika

1. Dramatically Lower Total Cost of Ownership

Save up to 60% vs. Citrix and VMware with Linux-based architecture, concurrent user licensing, and no costly SQL Server or gateway licenses.

2. Data Sovereignty

Inuvika does not require and does not hold any of your data. Everything is safely stored on your own or your MSP's servers.

3. True Platform Flexibility

Hypervisor agnostic (vSphere, KVM, Hyper-V, Proxmox, Nutanix) and cloud agnostic (AWS, Azure, GCP, private data centers, or hybrid).

4. Built for MSPs and Service Providers

Native multi-tenancy lets you host multiple clients on a single deployment. Manage all customers from one unified console.

5. Enterprise-Grade Security Without Complexity

Zero Trust architecture with granular access control, integrated 2FA, full encryption, and the Enterprise Secure Gateway—replaces traditional VPNs.

Ready to make the switch?

See firsthand how Inuvika OVD Enterprise outperforms the competition—in performance, security, and TCO.
